

UBB5.5G , Connecting Intelligence for New Growth

Ultra-Broadband Forum 2023
October 12th to 13th Dubai

Dear Mr./Ms. _____,

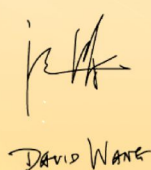

We sincerely invite you to attend the 9th Ultra-Broadband Forum (UBBF) to be held in Dubai, UAE from October 12th to 13th, 2023.

UBBF is an influential thought leadership event on the fixed network industry calendar. Through this forum, we aim to build a valuable communication platform for the ultra-broadband industry, promote industry consensus and business cooperation among industry chain members, and build a sustainable ultra-broadband industry ecosystem.

Big data-driven generative AI technologies are driving a new round of scientific and technological revolution and industrial transformation, accelerating the arrival of an intelligent world. New applications such as intelligent assistant, digital avatar, and AI video generation accelerate the development of smart home, smart office, and smart manufacturing, motivating numerous industries to transition from digitalization to intelligence. As the cornerstone of an intelligent world, ultra-broadband intelligent connectivity brings new development opportunities to carriers and creates an unprecedented industry space.

This forum will bring together global leading operators, industry leaders, regulators, standards organizations, industry alliances, and more in Dubai. Themed "UBB5.5G, Connecting Intelligence for New Growth", it will encourage joint innovation efforts, explore how to build ultra-broadband network infrastructures oriented to the intelligent era, and open up new industry space in order to achieve new business growth.

Looking forward to seeing you there. Together, let's continue to evolve and enhance digital infrastructures to bring digital to every person, home and organization for a fully connected, intelligent world.

David Wang
